Dear Parent/Guardian,

The Child Dental Staff will be conducting a plaque disclosing and brushing activity at the Buronga School. This is a preventative program to improve students' dental health and provide oral health information and instruction on how to brush correctly.

Plaque Disclosing & Tooth Brushing
We are planning to use Plaque Disclosing Gel which is painted on and rinsed off. The students will be able to see any plaque on their teeth and then brush it all away.
We will be providing toothbrushes and toothpaste for each child.

Please call us on **0419 990 264** if you have any questions about the activity

Thankyou

Lisa Testa
Senior Dental Therapist

Plaque Disclosing Gel
The Plaque Disclosing Gel is called Tri-Plaque ID Gel.
If your child is allergic or sensitive to Benzoate Preservatives they should not participate in this part of the activity.
However they can still brush their teeth.

~~✂~~.....

PLEASE COMPLETE AND RETURN TO BURONGA PUBLIC SCHOOL

I give my consent for _____ to participate in the

Plaque Disclosing & Brushing Activity at School YES NO

My child is allergic to Benzoate Preservatives YES NO
